

Your Beautiful Smile

Missing front teeth have unique demands... Replacing them must take into account both their function and their appearance. Nobel Biocare has been dedicated to restoring and preserving smiles for over 40 years. Through dedicated research, development and clinical experience, Nobel Biocare has become the world leader in esthetic solutions.

Now there is no need to worry, with Nobel Biocare implants, your missing teeth can be easily, comfortably, and permanently replaced. You'll appreciate the fact that your treatment preserved your remaining natural teeth.

The outcomes possible with Nobel Biocare implants and Procera® ceramic crowns offer the best esthetics available in dentistry today.

When you choose a Procera® ceramic crown, you'll have the ultimate beautiful smile - because Procera® crowns look just like your natural teeth. Procera® crowns are custom-made just for you, incredibly strong and beautiful, and have a precision fit.

Translucent-like your natural teeth

shorten treatment time

With Nobel Biocare implants, your front teeth can be restored very quickly.

perfect fit. perfect match

When coupled with Procera® crowns or bridges, your new teeth are indistinguishable from your real teeth.

eat whatever you want

Your dentist makes it possible to have new, fully functioning teeth, sometimes in as little as one hour. Implants are stable and secure, so you can comfortably eat all your favorite foods.

metal-free - for a beautiful smile

Nobel Biocare Procera® ceramic teeth are completely metal-free and will leave no ugly black lines.

keep looking younger

When you lose your teeth, your jawbone can shrink - making you look older. Implants help prevent this process.

save healthy teeth

With traditional methods, if you are missing a tooth, the teeth on either side of it are ground down to make a bridge. Implants often make that unnecessary. Implants do not compromise surrounding healthy teeth.

an answer for life

Nobel Biocare dental implants are the long-lasting solution - often for life.
