

"There was no discomfort at all. The procedure was pain-free and fast. There was no discomfort afterwards, whatsoever. My new teeth feel like a natural part of me. They also make me feel and act more naturally again – smiling with confidence, chewing on both sides like normal. I can definitely recommend this to others."
-Gun-Britt

why dental implants?

- Helps prevent bone loss
- More conservative treatment option; no grinding down of healthy teeth
- Helps keep other teeth in position
- Natural-looking results
- Life-long solution
- Improved quality of life

With Nobel Biocare dental implants and Procera® ceramic crowns, you no longer have to be embarrassed or worried about your teeth. In fact, new teeth can transform your self-esteem. Again and again, we find that a beautiful smile makes a real difference in people's lives.

Ask your dentist about the ways in which Nobel Biocare can help you.

Patient's notes

Handwritten note:

There was no discomfort at all. The procedure was pain-free and fast. There was no discomfort afterwards, whatsoever. My new teeth feel like a natural part of me. They also make me feel and act more naturally again – smiling with confidence, chewing on both sides like normal. I can definitely recommend this to others."

Whether You're Missing One or Several Teeth - Nobel Biocare Can Help

Everyone deserves a beautiful smile. With the tremendous advances in esthetic dentistry, there's no need to put up with anything less. With Nobel Biocare implants, crowns and bridges, missing teeth can now be easily, comfortably, and permanently replaced.

Besides functioning properly, the ideal replacement must look like a natural tooth, both to you and others. The solutions possible with Nobel Biocare implants and Procera® ceramic crowns take advantage of the best esthetic tools possible in dentistry. Procera® crowns and bridges look amazing and work just like your original teeth, they are nearly indistinguishable from your real teeth.

"Dental implants made me smile again. In an accident I lost three teeth. An implant-retained fixed bridge has enabled me to once again enjoy every day life. The impact is double to triple what I expected."

-Alice

short surgery

Placing Nobel Biocare implants is typically quick & easy.

perfect fit, perfect match

When coupled with Procera® Crowns or Bridges, your new teeth are indistinguishable from your real teeth.

eat whatever you want

Your dentist makes it possible to have new, fully functioning teeth, sometimes in as little as one hour. Implants are stable and secure, so you can comfortably eat all your favorite foods.

metal-free – for a beautiful smile

Nobel Biocare Procera® Crowns and Bridges are completely metal-free and will leave no ugly black lines.

keep looking younger

When you lose your teeth, your jawbone can shrink – making you look older. Implants help prevent this process.

save healthy teeth

With traditional methods, if you are missing a tooth, the teeth on either side of it are ground down to make a bridge. Implants often make that unnecessary. Implants do not compromise surrounding healthy teeth.

an answer for life

Nobel Biocare dental implants are the long-lasting solution – often for life.

one missing tooth

Here's an example of how your dentist replaces a missing tooth, in this case with an implant and ceramic crown. It's just one of several options, so consult your dentist to find out the best solution for your individual condition.

The Beautiful Result

The new tooth should fit and function just like a natural tooth. Continue your usual dental hygiene to keep both teeth and gums, healthy.

several missing teeth

Here's an example of how your dentist replaces three missing teeth. In this case, a fixed bridge – with all the teeth contained in one unit – is supported by dental implants.

This treatment is just one of several options, so consult your dentist to find the best solution for your individual condition.

The Beautiful Result

The new Procera® bridge will handle all the pressure that your strong, natural teeth did. You can now eat whatever you like. Traditional partial dentures can't offer the same stability or function, often limiting taste and restricting which foods you can eat.
